ABOUT ME

I am a third-year Software Engineering student at the University of Phayao, seeking work experience in software testing. I enjoy working with details and solving problems, and I hope my skills are suitable for this position in your company. Thank you.

PROJECTS

Sunseeker (Team project)

Jul 2023 - Sep 2024

UX/UI design and Front-end Developer

- Designed the landing page and eight additional pages in Figma, ensuring a consistent, user-friendly, and responsive interface.
- Developed the frontend using HTML, Tailwind CSS, JavaScript, and Next.js, focusing on clean layout and accessibility.

Second-hand IT Equipment (Team project)

Jul 2024 - Sep 2025

UX/UI design and Front-end Developer

- In this project, I took charge of both UX/UI design and front-end development. The interface was built using Next.js, with Tailwind CSS applied for styling and layout.

Citizen Information Management System for Mae Chan Subdistrict Municipality (Team project)

Dec 2024 - PRESENT

UX/UI design and Tester

- Participated in designing key pages, including landing and registration, with a focus on intuitive UX and seamless user flow.
- Performed manual testing of the citizen information management system to ensure functionality and reliability.
- Wrote test cases to verify key features and identify potential issues during development.
